AN ICON REBORN FOR MODERN THRILL. THE NISSAN Z

Trends come and go, but some things never go out of style. The Nissan Z is an icon redesigned for the modern era of excitement, with an exterior that pays homage to previous Z models, an array of Nissan Intelligent Mobility technology, and the exhilaration of a V6 Twin-Turbo engine.

EXCITEMENT THAT WRAPS AROUND YOU

The Nissan Z's interior is designed to make you feel what a true sports car should be like. From premium leather seats to a GT-R inspired steering wheel, everything is carefully crafted for maximum thrill.

383-HORSEPOWER, TWIN-TURBO V6 ENGINE

At the heart of the Nissan Z is a 3.0L V6 Twin-Turbo engine. An aluminum-alloy block and heads keep things light, while a water-cooled intercooler helps reduce the temperature of incoming air. Tech brings power with 475 Nm of torque starting at under 1,600 rpm.

6-SPEED MANUAL AND 9-SPEED AUTOMATIC TRANSMISSIONS

An upgraded 6-speed manual transmission with available SynchroRev Match® means pure driving thrills. An available 9-speed automatic with shift-by-wire controls brings cutting-edge technology and response.

A CHASSIS BUILT FOR EXHILARATION

The Nissan Z is designed to handle your exhilarating drives with new monotube shocks and suspension tuning for enhanced response. Strong and lightweight aluminum and carbon-fiber composite components, plus massive 19" RAYS® super-lightweight forged wheels with new performance tires will give a G-induced smile at every turn.

LAUNCH CONTROL AND MECHANICAL LIMITED-SLIP DIFFERENTIAL

A first for the Nissan Z — available launch control helps reduce wheel spin and hop, by holding the engine at a pre-set rpm and modulating power as you pull away, to give you quick and consistent acceleration every time. Combined with the Nissan Z's mechanical limited-slip differential, it lets you enjoy every last rpm that the powerhouse serves up.

CONFIDENCE AT EVERY TURN

The Nissan Z now comes with an array of Nissan Intelligent Mobility features that give you the confidence to push the limits of excitement. These intelligent features are designed to monitor what's around you and can step in and take action to help keep you out of trouble.

Intelligent Cruise Control

Watches the flow of traffic to give you a smoother ride. The system helps maintain an adjustable speed and sets the distance between you and the vehicle ahead.

Blind Spot Warning

Helps you keep an eye on blind spot areas. It gives you visual and audible alerts when it detects a vehicle hidden from sight, so you have more confidence when changing lanes.

Intelligent Forward Collision Warning

Monitors your speed and the distance from the car ahead, and alerts you to slow down via audio and visual alerts.

High Beam Assist

Automatically switches to low beam headlights when it detects a vehicle ahead and turns the high beams back on when needed.

Forward Emergency Braking with Pedestrian Detection

Monitors your speed and distance between you and the car ahead and lets you know if you need to slow down. It can also automatically engage the brakes to help avoid a frontal collision or lessen the severity of an impact. It also engages the brakes when it detects a pedestrian in the crosswalk.

Graphite Leather / Synthetic-Suede
